MEDIA SOURCE 200

Hi·Res AUDIO

OVERVIEW

The Media Source 200 is a simple way to enjoy your music in any room and it is the perfect high-resolution partner for any analogue or digital system. The Media Source 200 is also a superb way to enjoy pristine, lossless audio with Meridian's award-winning Sooloos.

Free iPad, iPhone, Touchscreen PC, Microsoft Surface, Windows and Mac apps are available to enable browsing and control. Basic configuration is completely automatic, with advanced features being configured via a web browser.

PRODUCT HIGHLIGHTS

This compact single-zone source provides access to your music library and music streaming services (where available) to the zone in which it is used.

- Proprietary Meridian audio enhancement technologies deliver the best sound quality from your music collection.
- Meridian SpeakerLink for direct connection to a pair of Meridian's DSP Loudspeakers: some models can also power the unit.

- S/PDIF Optical digital audio output for connection to surround receivers or other digital devices.
- Mounts directly into a Meridian in-wall loudspeaker.

MERIDIAN

USER FEATURES

- Create a single or an additional zone of Meridian audio simply with the Media Source 200 and a pair of Meridian DSP Loudspeakers.

- Analogue audio output for simple connection to a hi-fi or multi-zone distributed audio system.

- Managed and controlled from any Control attached to the Sooloos network, including wirelessly via the free Core Control apps.

- Employs DHCP for setup-free connection to the network and includes automatic discovery for integration with other Sooloos components.

- Built-in infrared receiver allows control of your Meridian system.

TECHNOLOGIES

MERIDIAN SOOLOOS

Meridian's award-winning Sooloos delivers pristine lossless audio quality with an extremely intuitive user interface. It automatically discovers and integrates with your network for instant installation, Sooloos is a modular, expandable system designed to suit your needs.

MERIDIAN APODISING FILTER

Media Source 200 delivers the best from your library, thanks to Meridian's proprietary "apodising" upsampling filter, which maximises digital audio quality and can even improve the sound of older digital recordings.

SPEAKERLINK

Traditional audio systems often require large, expensive cables to maintain their performance. Meridian's SpeakerLink uses an "Ethernet style" cable that delivers pristine digital sound and control down a single cable between Meridian components.

FRONT AND REAR

CONSTRUCTION

Media Source 200 features an elegant, compact aluminium enclosure with moulded endcaps. Connectors are mounted at one end and LED indicators behind an infrared receptor window at the other, the latter allowing the unit to receive IR commands for an entire Meridian audio system via, for example, an MSR+.

- The enclosure is designed to be free-standing or installed in conjunction with Meridian's in-wall loudspeakers where it mounts in the loudspeaker enclosure to create an unobtrusive Meridian Sooloos zone.
- Multiple units can be accommodated in a dedicated rack shelf (available separately).

SPECIFICATION

OUTPUTS	•	Meridian SpeakerLink connector (RJ45)		
	•	Analogue stereo unbalanced (3.5mm combination jack)		
	•	Digital S/PDIF optical (3.5mm combination jack)
